

Roll number	Name	Paper no.	date (tentative)	paper (related notes)	presentation	general instructions
	Leelavati Narlikar	0		Bowtie	slides	0. Everyone has to read the paper before coming to class on the day of the presentaion.
20231017	Adyasha Mohapatra	1	Thu, Jan 29	MACS	slides	
20231252	Sritama Senapati	1				
20221169	Naveed Thalappil	2	Mon, Feb 02	MEME (but also mention other related tools in meme-suite)	slides	Instructions for presenters: 1. If the paper describes an algorithm, show the step by step execution with an example. 2. If the paper compares performance with other methods, describe (in brief) what the other methods do differently. 3. If the paper comes with code, execute it on their data or your toy data, and show results. If you are unable to do this, say why. 4. If there is a later version of the same method mention what that does differently (but with less detail than point 1). 5. Talk about advantages and limitations (whatever the paper mentions and those you find in addition). Can you suggest a way to overcome the limitations? 6. Some papers are more about the Biology findings (especially the later papers), in that case, focus more on the results. 7. After the presentation, send the slides to the instructor to share with everyone.
